A NEW DRYER FACILITY FOR FORT WORTH

The City of Fort Worth's Village Creek Water Reclamation Facility was interested in reducing the hauling cost of the sludge generated by their belt filter press dewatering facility. The City established a public-private partnership with **Synagro** to provide a long term solution to their biosolids needs. After evaluating multiple proposals, the City selected the team of **Synagro, Andritz Separation, Archer Western Construction** and **Freese and Nichols** to provide a complete sludge treatment facility. **Andritz** supplied drum thickeners, dewatering centrifuges and a DDS 140 drum dryer, the largest single line dryer in the world. The new facility, which started up in July of 2022, is expected to save the City approximately \$200,000 per month on O&M costs compared to the previous belt filter press operation while reducing product volume by 70%. The Village Creek dryer facility is the third **Andritz** installation in the state of Texas. Please contact us if you'd like to learn more about the benefits of sludge drying.

INTRODUCING A NEW LINE

We are pleased to announce that Hartwell is the new representative for **Electrichlor** in Texas and Oklahoma. **Electrichlor** is a leading manufacturer of high efficiency onsite sodium hypochlorite generation systems. Their unique electrolytic cell design allows for increased production capacity along with extended anode life and minimal maintenance requirements. **Electrichlor** offers a wide range of standard system designs as well as custom designs to address your specific requirements. Feel free to visit their website at www.electrichlor.com or contact us for more information.

FOND FARWELL

After over 23 years with Hartwell, Jim Beer, Partner and Vice President in our Tulsa office, retired at the end of October. Jim played a critical role in the growth of Hartwell's north Texas office before moving to Tulsa in 2005 to establish our office there. His sales acumen and project management skills were pivotal in establishing and growing Hartwell's business base in Oklahoma. Jim now plans to spend more time with his family and work on his golf handicap. Please join us in wishing Jim a long and enjoyable retirement.

SEASONS GREETINGS

At this time of year, we again extend our thanks and best wishes to all of our customers. You have helped us achieve another successful year and we deeply appreciate your patronage throughout the years. May you and your family enjoy this special season and have a very prosperous 2023!
