## The Latest in Technology for The Treatment of Water & Wastewater

### AFTERMARKET ACTIVITY

The **City of Houston** recently awarded a project to rehabilitate their **Suez Climber Mechanical Bar Screen** at their **Kingwood WWTP**. The project was set up on a turnkey basis whereby the rake mechanism and cogwheel pin racks were removed and replaced with new components. We have handled many rehabilitations of this type of coarse screen as well as other fine screens.

Give us a call if you would like us to visit, inspect and provide a quotation to breathe new life into your equipment.

### NEW AQUADIAMONDS® IN NORTH TEXAS

Two plants in North Texas recently awarded contracts to convert existing traveling bridge sand filters to **AquaDiamond® Cloth Media Filters** manufactured by **Aqua-Aerobics Systems**. The **TRA Ten Mile Creek RWWS** will be adding a second **AquaDiamond®** filter. The project was designed by **Plummer Associates** (Fort Worth) and **Gracon Construction** (Dallas) will be the installing contractor. The **City of Garland** will also be adding four **AquaDiamond®** filters at their **Rowlett Creek WWTP**. **Perkins Engineering Consultants** (Arlington) was the design engineer and **Archer Western Construction** (Irving) is the contractor on the project.

## MOBILE ODOR CONTROL SOLUTIONS

**ECS Environmental Solutions** now offers a mobile solution for odor control issues. Their **VaporPac Systems** are made from stainless steel and non-composite components that can handle between 500 and 30,000 CFM, and are offered with different media options to accommodate complex odors. The units can be onsite and operable within 24 hours based on availability. Please let us know if we can be of assistance with your odor issues.
