### INTRODUCING A NEW LINE

We are pleased to announce that Hartwell is the new representative for **DMT Environmental Technology** in Texas and Oklahoma. **DMT** is a leading provider of products and technologies for biogas conditioning and upgrading as well as desulphurization. **DMT's** industry-leading technologies can assist both municipal and industrial wastewater treatment plants with anaerobic digestion in generating reusable biomethane as an alternative to simply flaring off the excess biogas. Feel free to visit their website at [www.dmt-et.com](http://www.dmt-et.com) or contact us for more information.

*More than thirty of our manufacturers will be exhibiting with us this year in Houston for Texas Water 2023, April 11 - April 13. Please try to attend and see the latest in technology on display.*

*We'll see you there!*

### 2023 SEMINAR SCHEDULE

Many of our clients and engineers from Texas and Oklahoma take advantage of the Aqua-Aerobic Technical Seminars each year. This is a great educational opportunity so please consider attending a one day technical/non-commercial session held at their Rockford, Illinois headquarters, just outside of Chicago. There are four seminars offered as follows:

May 25th	Topic: <b>Biological Processes</b>
July 20th	Topic: <b>AquaNereda® Aerobic Granular Sludge</b>
August 24th	Topic: <b>Filtration Technologies</b>
September 29th	Topic: <b>Innovative Technologies</b>

You will also have an opportunity to visit the Aqua-Aerobic Research & Technology Center. Educational credits are provided for operators and engineers. There is No Cost for attendees for either the seminar or associated travel. Please contact us for additional information.

**IN NEED OF AFTER-MARKET PARTS, SERVICE, OR REPAIR?**

## ANOTHER FOURNIER ROTARY PRESS FOR TEXAS

The **Fournier** Rotary Press continues to gain popularity in Texas. Featuring low pressure, low maintenance technology, the **Fournier** rotary press features low speed, rotating filter elements that when coupled with discharge restrictions generates a high solids cake and quality filtrate. Our newest installation is at the **Fort Bend WCID #2**. The design engineer was **Quiddity Engineers** (Houston) and the installing contractor was **PLW Waterworks** (The Woodlands). Please visit [www.fournierdewatering.com](http://www.fournierdewatering.com) for more details on the features and benefits of the **Fournier** Rotary Press.

## NEW NORTH TEXAS PROJECT | TRA Mountain Creek RWS

**Equipment:** Belt Filter Press by **Andritz Separation**  
Cloth Media Filters by **Aqua-Aerobic Systems**  
Odor Control System by **ECS**  
PC Pumps by **Seepex**  
Polymer Feed System by **VeloDyne**

**Engineer:** **Garver Engineers** (Frisco)  
**Freese and Nichols** (Fort Worth)  
**Contractor:** **Gracon Construction** (Mesquite)
